The Faculty of Veterinary Medicine at the University of Teramo has been approved by the European Association of Establishments for Veterinary Education (EAEVE) – the association that establishes the quality of teaching for the European Faculties of Veterinary Medicine. Such an achievement is a milestone for our University and a guarantee for students who aim at becoming professionals able to compete and succeed in the Italian and European job market.

The five-year **Single-Cycle Degree Course in Veterinary Medicine** (LM-42,) aims at graduating professionals with valid scientific, theoretical as well as practical skills, which are essential for practicing as a Veterinarian. The Faculty also offers a **three-year Bachelor in Animal Welfare and Protection** (L-38) awarding a degree in the field of welfare of domestic and wild animals; and a **two-year Master in Sustainable Livestock Production Science** (LM-86) aiming at training professionals specialised in sustainable animal production in terms of livestock efficiency, environmental impact assessment and animal welfare.

In December 2017 the Single-Cycle Degree Course in Veterinary Medicine obtained the **full Periodic Accreditation by the ANVUR** (the Italian National Agency for the Evaluation of Universities and Research Institutes) after an official visit of “Evaluation Experts” (CEV). According to the **CENSIS ranking** evaluating teaching and research quality of Italian Universities, such a Degree Course placed second in 2016 and third in 2014, 2015, 2017 and 2018 among the thirteen Veterinary Medicine Faculties in Italy. It provides a high-quality education, teaching all the theoretical and practical skills necessary for a newly graduated veterinary surgeon who will be able work in the different professional fields.

Students benefit from educational, research and diagnostic laboratories, the **University Veterinary Teaching Hospital**, a University Farm and external partners at a local, national and international level.

Students may also take advantage of international study, research and training programmes offered by several partnerships with many research institutions and clinics worldwide.

Teaching staff include several Diplomates of European Colleges of Veterinary Medicine and numerous excellent professionals and researchers.

The Faculty has various **postgraduate training programmes** – i.e. a PhD programme, Specialisation Schools, 1st and 2nd level vocational training programmes.
