Faculty of Veterinary Medicine

Vision
The VMF pursues the improvement of the society by high-level teaching, basic and applied research, firm cooperation with the Public Health National Services and the safeguard of the environment in synergy with the productive world.

Teaching aims
1. To improve and support the quality, attraction and the efficiency of the Veterinary Medicine degree, in accordance with international (EU directives, ESEVT) and national (ANVUR) guidelines.
2. To improve and support teaching facilities
3. To promote high-standard and international teaching

Research aims
1. To set up a board to manage and improve the research activities
2. To develop and support research training for young people enrolling young researchers based on their scientific competencies
3. To improve the main VMF research targets (companion animal, public health, sustainable animal production, etc.)
4. To improve facilities and equipment for basic and applied researches
5. To promote dissemination of the VMF research activities, in order to get national and international funding for research and for international scientific relationships

Third mission (transfer of technology and knowledge)
1. To set up a Third Mission Board to manage and improve the related activities
2. To develop and improve activities with social implications
3. To support the development or the VTH and the CTF and their facilities
4. To develop and improve research result transfer
5. To promote lifelong educations and training for public veterinarians and practitioners
6. To publicize activities performed at the VMF by organizing activities for the students of primary and secondary schools
7. Act as an active part in job placement for young graduated students.
